- Suitable for use in the food sector, animal hygiene and in care institutions (PT2/PT3/PT4)

- Approval number Belgium: BE-REG-01298, The Netherlands: 8960 N, Luxembourg: 81/25/L

pH 6,7

USAGE

product information. Use biocides safely. Read the label and product information before use.

Preparatory actions:

First thoroughly clean the surfaces and materials to be disinfected. Then rinse off any cleaning agent used with clean water. Remove excess liquid.

Method of application:

When disinfecting, use so much liquid that the surfaces remain wet during the application time. Minimum application time 5 minutes at +20°C. If treated surfaces or materials may come into contact with food and drink, thorough rinsing with clean water is required after the application time.

Prescribed dose: 1 tablet per 5 liters of water (at 18°C-25°C).

1 tablet to 5 liters of water gives 300ppm of active chlorine:

- 150ppm for mops, mops, sponge and dishcloths.
- 200 ppm for work tables and cutlery.
- 1000 ppm for general laboratory use.
- 2500 ppm for medical instruments.

Do not mix with acidic cleaners.

Only use this product for its specified purposes. If in doubt, first test the product in an inconspicuous area. BOMA is not responsible for any damages if the product is used incorrectly. Consult the Safety Data Sheet (SDS) for additional information.
