

One-shot insecticide - 250 ml ((BE: BE-REG-02159, LUX: 192/14/L-000) (Batch: BAVO54814)

GENERAL

Insecticide against crawling and flying insects

- Instantly kills flies, mosquitoes, wasps, moths, fleas, cockroaches, beetles, etc. thanks to its powerful knock-down action
- Aerosol spray can with automatic drain valve
- Zerox® One Shot contains pyrethrum, a vegetable extract that is extracted from a chrysanthemum variety
- Authorization number: Belgium BE-REG-02159, France 4034, Luxembourg 192/14 / L-000
- This product is not suitable for sale and use in the Netherlands

USAGE

Use biocidal products with caution. Read the label and the information relating to the product before use.

Dose: 1 spray can of 250 ml is sufficient for: an area of $\approx 600 \text{ m}^3$ against flies, mosquitoes, moths and wasps. an area of $\approx 300 \text{ m}^3$ against fleas, beetles and silverfish, an area of $\approx 100 \text{ m}^3$ against cockroaches.

Application method: close doors and windows. Place the can in the center of the room and never directly in contact with the ground surface (preferably on a 40 x 40 cm piece of cardboard). Remove the sealing ring. Turn the 'One Shot' valve completely down until a powerful mist escapes. Leave the room and keep it closed for at least 4 hours. Then air well for at least 1 hour before using the room again. The application and ventilation of the room must be carried out by one and the same person. Zerox® One Shot has no aftereffects. Repeat the application if necessary.

Remarks: For the treatment of small spaces, the automatic deflation can be interrupted by turning the valve upwards (fractional application). The total deflation time of a 250 ml aerosol is approximately 2 minutes; i.e. per 30 sec. one treats 150 m^3 against flying insects, 75 m^3 against fleas and 25 m^3 against cockroaches. Contains acetone. Avoid the mist getting onto plastics, such as e.g. computer screens, plexiglass, CDs, etc.
